

# Web searches

## Worksheet

---

**Activity:**

Web searches help you find inspiration from the web. Choose your favorite brainstormed ideas, write a one or two sentence description of what you are looking for. When you find an interesting result (either as a positive inspiration or what to

avoid), save the link (so you can find it again), grab a relevant screen shot (so you can quickly skim through the ideas), and explain why you think it is relevant.
