

HCI Bootcamp

28 October – 4 November 2019

Wendy Mackay
mackay@lri.fr

<https://ex-situ.lri.fr/people/mackay/teaching/2019-HCIBootcamp>

HCI Bootcamp Schedule

Building: SupeLec building

Monday	Tuesday	Wednesday	Thursday	Friday
		Interview exercise 11 Sep		
Interpret users 28 Oct 9 ³⁰ - 16 ³⁰	Explore Ideas 29 Oct 9 ³⁰ - 16 ³⁰	Video Prototype 1 30 Oct 9 ³⁰ - 16 ³⁰	Redesign: Prototype 2 31 Oct 9 ³⁰ - 16 ³⁰	Holiday 1 Nov
Final presentation 4 Nov 13 ³⁰ - 17 ³⁰				

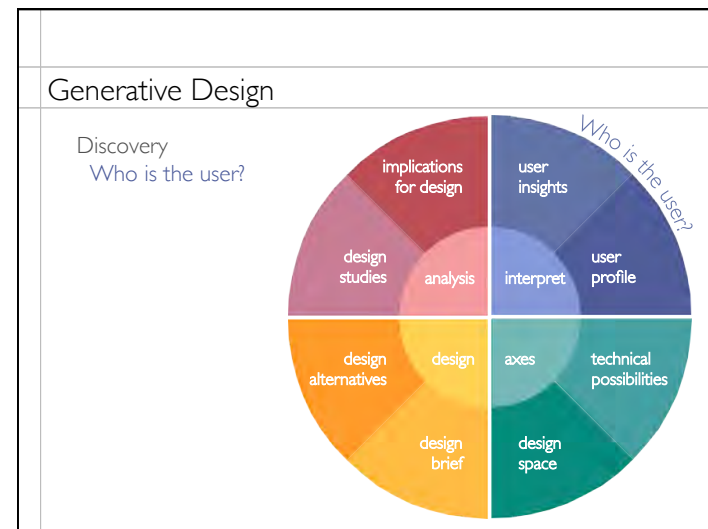

HCI Bootcamp: one *intense* week!!

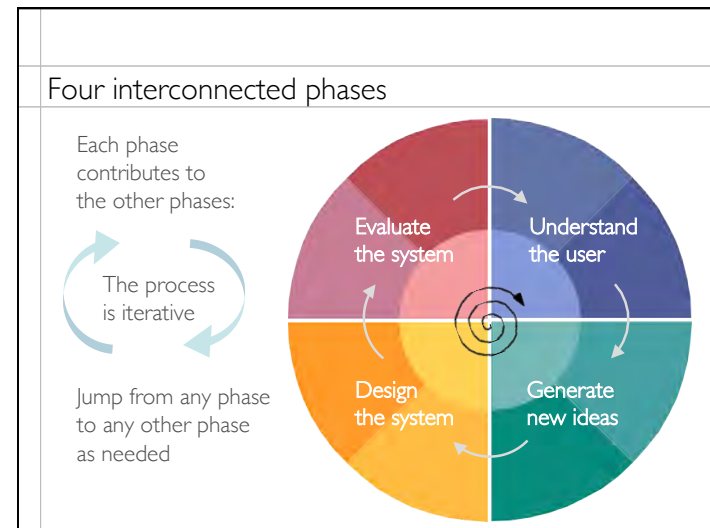

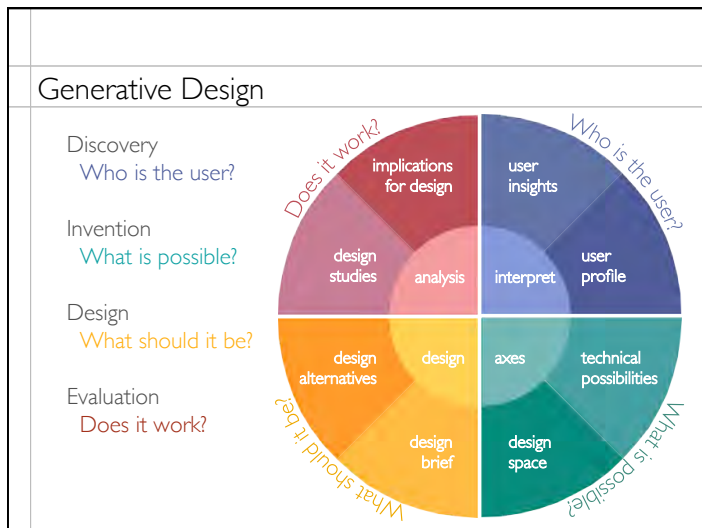

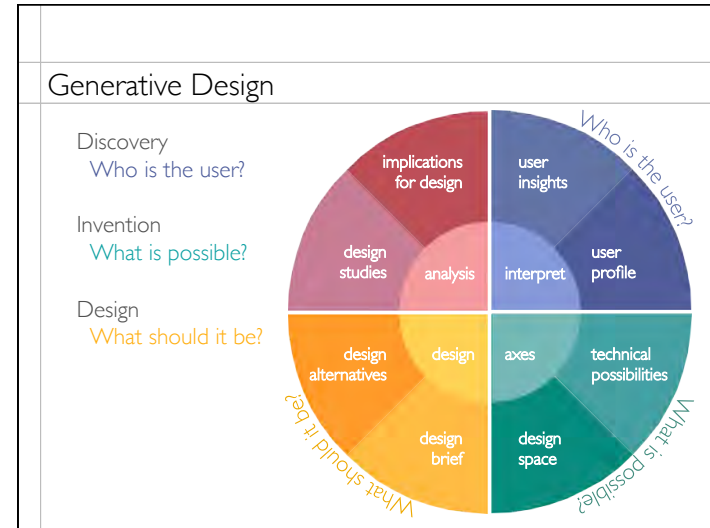

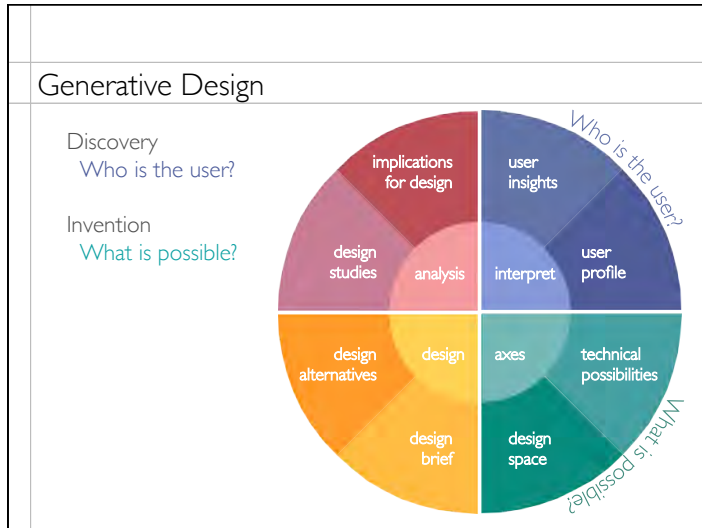

- Lectures (in class)
 - Present fundamentals & principles from different disciplines
 - Relate design activities to each other - complete design process
- Design activities (in class or at home)
 - Individual *and* group
 - Each exercise builds upon previous results
- Project (in class and at home)
 - Groups of 4
 - Goal: produce a grounded video prototype

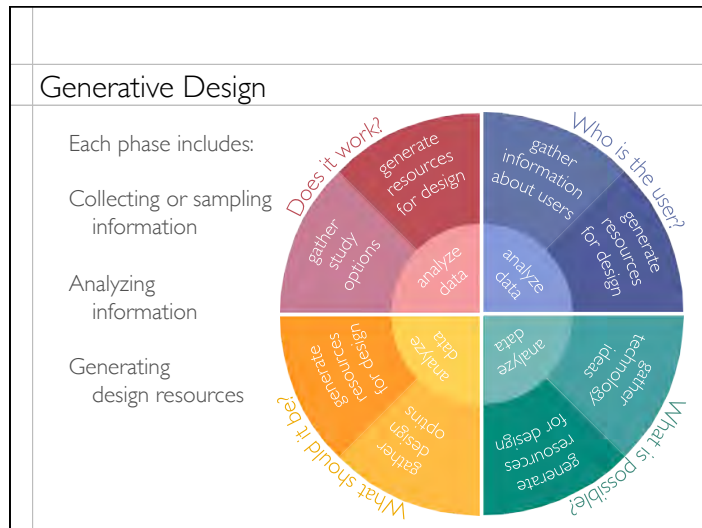

Who is who?	
Wendy Mackay Research Director	mackay@lri.fr professor
Yi Zhang Ph.D. student	Zhang@lri.fr teaching assistant
Tong Xue Ph.D. student	tong.xue@u-psud.fr teaching assistant

HCI Bootcamp project
<p>Create a video prototype of a redesigned interactive map Meet the needs of <i>real users in a real setting</i></p> <p>Work in groups of 3 or 4 people</p> <p><u>Attendance is critical!</u></p> <p>Grades:</p> <ul style="list-style-type: none"> Individual: in-class participation and some design activities Group: most design activities final presentation of video prototype final poster

2 Story interviews due: Wednesday, 25 September
<p>Individual activity: Story interview with two (or more) people Generate (at least) two real, detailed stories</p> <p>Feedback: If you submit your interviews on time, you can revise them to make sure they are right</p> <p>Important!!</p> <p>Good interviews: inspire innovative ideas Poor interviews: you won't do well...</p>

Design brief	
Find a <u>real</u> group of users with a <u>real</u> problem to solve*	
Gather detailed, step-by-step stories What went wrong? What worked well? What surprised you?	
Design a technology innovation to help these users in a particular setting	
Focus on a <u>specific audience</u> do not try to solve everyone's problem	
	* May include having fun

Group project	
Choose groups: ideally four people per group	
Gather 8 or more story interviews Each person conducts <i>at least</i> two story interviews to inspire ideas for your project	

Design Brief: Map Redesign

This year's design challenge:
 Redesign a Map application (Google Maps or ...?)
 using principles of instrumental interaction

Find examples of real user needs
 when using a map app on a phone

Create a new design that addresses a real problem
 and illustrate with a video prototype

Redesign the app
 using principles of instrumental interaction

Story Interviews

How to ask questions

The form of the question
 provides the form of the response

If you want specific, real answers,
 you *must* ask the questions correctly

If not, you will get vague general answers
 that provide little help with design

Careful! This is *not* a marketing interview
 Your goal is to better understand users
 to design a better system

On memory

Long-term memory is organized into two major categories

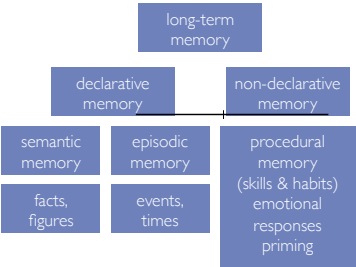

- declarative
- non-declarative

Declarative memory

- semantic memory including facts & figures
- episodic memory including events, times

Non-declarative memory

- procedural memory including skills & habits
- emotional responses can be primed

When we interview
<p>We can ask for:</p> <ul style="list-style-type: none"> Descriptions <ul style="list-style-type: none"> What is this <technology>? Explanations <ul style="list-style-type: none"> How does this <technology> work? Stories <ul style="list-style-type: none"> What happened to those people when they used this <technology>? Conversations <ul style="list-style-type: none"> What did those people communicate to each other?

Types of Interviews												
<table> <tr> <td>Story interviews</td> <td>Best for design</td> </tr> <tr> <td colspan="2">Elicit real stories that include user context, breakdowns, work arounds and user innovations</td> </tr> <tr> <td>Tutorial interviews</td> <td>Lacks breakdowns</td> </tr> <tr> <td colspan="2">Describe how it is supposed to work, not how it actually works</td> </tr> <tr> <td>Opinion interview</td> <td>Lacks detail</td> </tr> <tr> <td colspan="2">Provide evidence of 'pain points' but little help for design</td> </tr> </table>	Story interviews	Best for design	Elicit real stories that include user context, breakdowns, work arounds and user innovations		Tutorial interviews	Lacks breakdowns	Describe how it is supposed to work, not how it actually works		Opinion interview	Lacks detail	Provide evidence of 'pain points' but little help for design	
Story interviews	Best for design											
Elicit real stories that include user context, breakdowns, work arounds and user innovations												
Tutorial interviews	Lacks breakdowns											
Describe how it is supposed to work, not how it actually works												
Opinion interview	Lacks detail											
Provide evidence of 'pain points' but little help for design												

How to ask questions
<p>Your goal is to understand <u>users in context</u> to design a better system</p> <p>Good design interviews provide concrete, specific <u>stories</u> include <u>context</u> emphasize <u>breakdowns</u></p> <p>NOT market surveys NOT explanations of how it is <i>supposed</i> to work</p>

Story Interviews
<p>Three main types:</p> <ul style="list-style-type: none"> Critical object Critical incident Recent event

Example: Asking questions about email

Bad question:
How do you manage your email?

Good question:
Tell me about the last time you looked for a particular message.

Why did you need it?
Why couldn't you find it?
What did you do first?
Then what happened?

Interview question examples

Critical Incident question:
Can you think of a time in the past few days when you tried to find a particular email message?
What steps did you go through to find it, step by step?

Critical object question:
Do you have a message that is currently in draft form, that you have not sent?
Please walk through the steps you took to create it and explain why it has not been sent?

Recent event:
Please walk through the process you went through to read your email this morning.

Choose questions that support design

Question order matters!!!

First particular then general

First concrete then abstract

First directed then open-ended

First facts then opinions

Interview Exercise

individual: 15-20 min per interview

Goal: Find a story about a recent, memorable event using a map application to solve a problem

Story interview
Ask critical object and/or critical incident questions to gather stories about recent, memorable uses of a map app on a phone

Take notes: Record your questions, their answers
Include questions to probe for more information

Convert key incidents into interaction points

Remember
<p><i>The form of the question provides the form of the response</i></p> <p>If you want specific, detailed answers, ALWAYS start with a SPECIFIC, RECENT question NEVER START WITH A GENERAL QUESTION</p> <p>Avoid yes/no questions or short answers</p> <p>PROBE for details: What happened next Get them to TELL YOU THE STORY</p>

Red flags:
<p>If you hear these, change the interview!</p> <p>Usually ... Sometimes ... Normally ... When I do this, ...</p> <p>YOU NEED TO SAVE THE INTERVIEW!!</p> <p>Probe for a specific story, NOT how they usually do things</p>

Important!!
<p>Good interviews that find real, surprising stories will</p> <ul style="list-style-type: none"> - make this course interesting and fun - produce innovative ideas - help you really learn and understand these techniques <p>Poor interviews that result in explanations will</p> <ul style="list-style-type: none"> - make this course frustrating - producing boring, useless ideas - not teach you much <p>THIS IS THE MOST IMPORTANT SKILL OF THE CLASS!!!</p>

Interaction points

Interaction Points: Summarize interviews

Interaction point: Titlecard

a	b	c

Interaction Points: Summarize interviews

Interaction point: Titlecard

a	b	c

Interaction Points: Summarize interviews

Interaction point: Titlecard

Describe what happened

a	b	c
Sketch: What did user do?	Sketch: How did system react?	Sketch: How did user respond?
Describe: What did user do?	Describe: How did system react?	Describe: How did user respond?

Interaction points

Miniature storyboards that describe interaction between the user and the system

Title: What does the user want to accomplish?

Sketches and descriptions — or —

What did the user do?	What did the system do?
How did the system react?	How did the user react?
How did the user react?	How did the system react?

Focus on surprises:
breakdowns, workarounds, user innovations

Homework Exercise: Story Interviews	
Due:	Wednesday, 25 September
to:	zhang@lri.fr , mackay@lri.fr
subject:	HCI Bootcamp Ex#1: Story Interviews
For each interview:	
Your name	Date, time & setting of interview
Interview topic	Interviewee information (job, age, sex)
Your questions	Their responses
Probing questions	Surprising answers
Bring paper copies of the interviews to class on Monday.	

Worksheets
