# CHI 2018 RETHINKING INTERACTION WORKSHOP

WENDY MACKAY  
MICHEL BEAUDOUIN-LAFON

---

# PARTICIPANTS

Beaudouin-Lafon, Michel, *Université Paris-Sud*  
Bødker, Susanne, *Aarhus University*  
Bowyer, Alex, Open Lab, *Newcastle University*  
Buschek, Daniel, *LMU Munich*  
Carpendale, Sheelagh, *University of Calgary*  
Chuang, Lewis, *Max Planck Institute*  
Dalsgaard, Peter, *Aarhus University*  
Eiselmayer, Alexander, *University of Zurich*  
Girouard, Audrey, *Carleton University*  
Hahn, Jürgen, *Universität Regensburg*  
Hollan, Jim, *UC San Diego*  
Klokmose, Clemens Nylandsted, *Aarhus Univ.*  
Knudsen, Søren, *University of Calgary*  
Koch, Janin, *Aalto University*  
Larsen-Ledet, Ida, *Aarhus University*  
Li, Jiajun, *Carnegie Mellon University*  
Mackay, Wendy, *Inria*  
Malloch, Joseph, *Dalhousie University*  
Nebeling, Michael, *University of Michigan*  
Poor, G Michael, *Baylor University*  
Prange, Sarah, *Univ. Applied Sciences, Munich*  
Roque, Licinio, *University of Coimbra*  
Schlesinger, Arielle, *Georgia Tech*  
Wimmer, Raphael, *Universität Regensburg*

---

# SCHEDULE

## **9:00 - 9:15 Welcome**

Introduce the workshop agenda and goals.

## **9:15 - 10:15 Keynotes**

Describe of theoretical principles.

## **10:15 - 10:30 Break**

## **10:30 - 12:15 Presentations**

Participants give 6-minute presentations.

## **12:15 - 13:30 Lunch Break**

## **13:30 - 15:00 Group Activities**

Compare and contrast design principles.  
Identify gaps and areas for future research.

## **15:00 - 15:30 Break**

## **15:30 - 16:30 Groups Feedback**

Each group presents their work.

## **16:30 - 17:00 Wrap-Up**

---

# RETHINKING INTERACTION

# WHAT WE WERE PROMISED

WHAT WE WERE PROMISED

# XEROX 6085 Workstation

## User-Interface Design

To make it easy to compose text and graphics, to do electronic filing, printing, and mailing all at the same workstation, requires a revolutionary user interface design.

**Bit-map display** - Each of the pixels on the 19" screen is mapped to a bit in memory; thus, arbitrarily complex images can be displayed. The 6085 displays all fonts and graphics as they will be printed. In addition, familiar office objects such as documents, folders, file drawers and in-baskets are portrayed as recognizable images.

**The mouse** - A unique pointing device that allows the user to quickly select any text, graphic or office object on the display.

### See and Point

All functions are visible to the user on the keyboard or on the screen. The user does filing and retrieval by selecting them with the mouse and touching the MOVE, COPY, DELETE or PROPERTIES command keys. Text and graphics are edited with the same keys.

### Shorter Production Times

Experience at Xerox with prototype workstations has shown shorter production times and thus lower costs, as a function of the percentage of use of the workstations. The following

# WHAT WE HAVE

Year	Men	WPS
1978	78	15.8
1980	41.1	39.9
1982	45	55
1984	30	70
1986	10	90
1988	5	95

Table 1: Percentages of use of methods.

Activity under the old and the new

Figure 2: Data from Table 1 drive

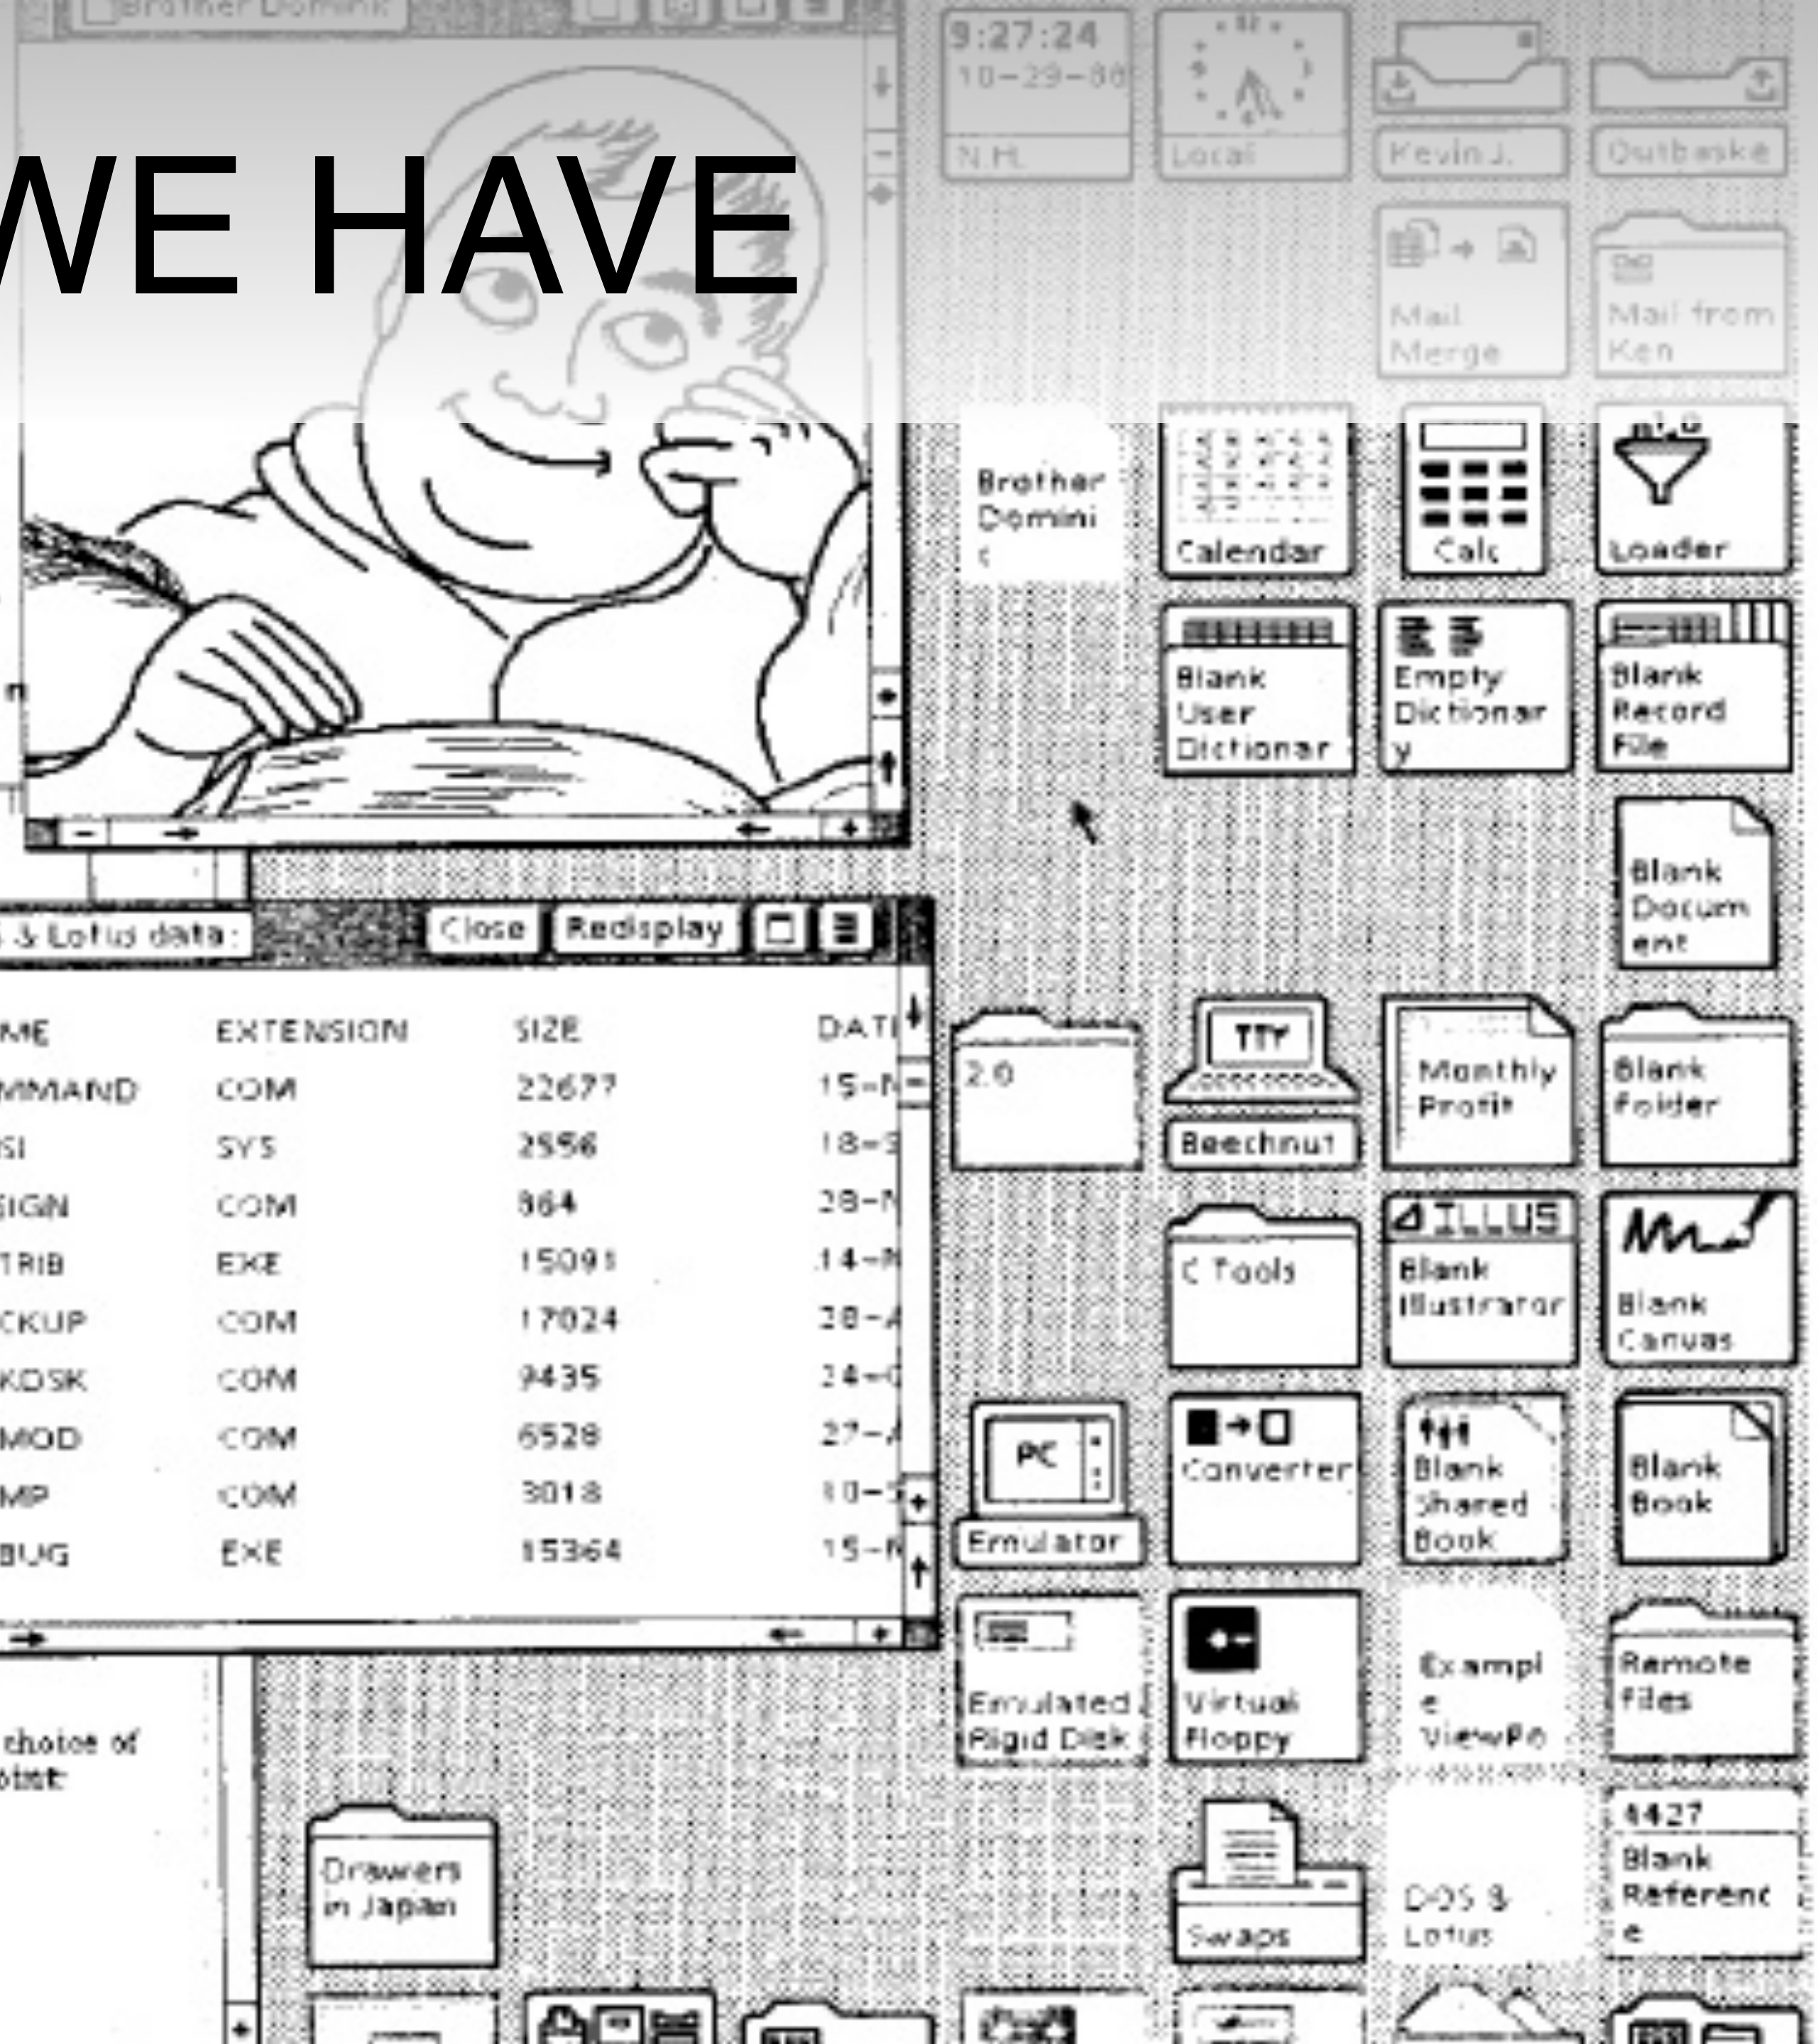

$$20 \times 10 = \sum_{i=1}^n \int_{a_i}^{b_i} \frac{1}{x^2 + 1} dx$$

Workstation usage percentages Table 1 and illustrated in Figure 2. 6085 users are likely to do more composition and layout, control process including printing and di

### Text and Graphics

To replace typesetting, the 6085 offers a choice of type fonts and sizes, from 6 point to 36 point.

Here is a sentence of 6-point text.  
 Here is a sentence of 12-point text.  
 18-point text.  
 24-point text.

WHAT IS LIKELY TO HAPPEN

- **How can we create interactive digital environments that are flexible enough to support appropriation by end users?**
- **How can we combine human intelligence with artificial intelligence to optimally benefit human activities rather than simply replace them?**
- **How can we help users shift easily across different types of human-computer partnerships, from full user control to full automation?**
