

# Design Walkthrough

## Worksheet

**Activity:**

Each group evaluates another group's video prototype, interaction point by interaction point. Evaluator group: Choose a moderator to ensure that everyone participates and a scribe. Everyone contributes feedback: be as constructive as possible. Look for problems and breakdowns first, then suggestions.

Presenter group: If something is not clear, explain in one sentence and then move on. Do **not** defend your design choices. Take your own notes and get the scribe's feedback at the end of the walkthrough. Later, decide how to incorporate the feedback to improve the revised video prototype.
